

Updated on March 9, 2009.

Important information concerning the videos, online and DVD.

The following information is subject to change with little or no notice so please keep an eye on future updates.

Portions of the Service may not be included on the Video(s).

Message:

A Message may not be included if for technical reasons parts of it are missing.

If the person who spoke the message asks that certain parts of it not be included then none of it will be included. Messages will not be put online or DVD by Danny Lee Fye out of context. If a person hears something said at church and not said on the online/DVD video then the integrity of the online/DVD video becomes questionable and a number of problems could arise.

So my policy concerning messages is all or nothing at all and I will not bend from that rule.

Ministry of Music, Introit, etc:

Will not be included if the accompaniment music is a copyrighted work.

If a person does not use a microphone. While many have great voices that can be heard quite well throughout the sanctuary, when a microphone is not used the recording will be sub par and not usable.

Other:

Other portions of the service may not be included for many other reasons including but not limited to sensitive information that it is best not to be shared online or on DVD, etc.

Note: These are my policies concerning the videos that I do. Church policies concerning their videos may vary.

Expanding Video Work.

The video work has expanded from the South Chrysler Congregation to the Liberty Street Congregation. So there will be Church services online from both congregations.

Danny Lee Fye will acquire the video from Liberty Street and Keith Jolliff will acquire the video from South Chrysler.

Danny Lee Fye will edit, process and convert the videos from both congregations to the wmv format and put them online.

No need to miss a Service.

Even though you may not be able to make it to Church on Sunday this does not mean you have to totally miss the service. One reason for the online and DVD videos is so that you can still see and hear the service(s). And maybe even see and hear them again.

Also, if there is someone you know that cannot go to Church or are interested in the Church services please let

them know that the videos are available and that they can be a part of the fellowship as well. You can even share the link(s)/DVD(s) of the videos with friends, relatives and many others.

The more people you tell about the videos the more people the ministry reaches out to. And they can in turn tell others.

Ministry.

The videos are one of many tools for ministry. A way to reach out to others who need a Church, looking for a Church as well as those who cannot be at Church for whatever the reason. There are many ways to reach out to others. This is just one of them. This is how I Danny Lee Fye can use my gifts and talents to help reach out to others. This is how others with gifts and talents like mine can also reach out to others. This is how those who don't have my gifts and talents can also use the videos to reach out to others as well as the many other tools, talents and abilities that God gave us to reach out to others.

Whatever your way is to reach out to others may be, it is important! There is no one way that is more or less important than the others! All are called according to their gifts and talents and this is just one of them.

May God bless you as you view the videos and as you listen to the hymns played by me on this web page.
